MEDIA RELEASE

DATA NETWORK ROLLOUT

3 March 2014

Goldenfields is pleased to announce the full rollout of its new data network in conjunction with Taggle Systems.

Initially devices will be installed on all GWCC water meters to provide usage data. This will allow better management of water supply in the region and allow leak detection.

As the project progresses Goldenfields will offer monitoring of other data including on farm moisture, rainfall, stock monitoring and information relating to the wildlife corridor(GWCC500) under construction.

There will be a formal signing of the agreement at midday 5 March 2014 at Goldenfields Temora office.
